

Create a web application using Node RED

Team ID	PNT2022TMID31030
Project Name	Smart waste management system for metropolitan cities

Screenshots:

The screenshot displays the Node-RED web interface in a browser. The browser's address bar shows the URL `127.0.0.1:1880/#flow/52ee0aa9f396b7f0`. The Node-RED workspace shows a flow named 'Flow 1' with two nodes: an 'IBM IoT' node (labeled 'connected') and a 'debug 1' node. The left sidebar contains a 'common' section with nodes like 'inject', 'debug', 'complete', 'catch', 'status', 'link in', 'link call', 'link out', and 'comment', and a 'function' section. The right sidebar shows the 'debug' console with a list of messages. The messages are JSON objects containing latitude and longitude data, such as `{ latitude: 11.7345, longitude: 78.202 }`. The bottom of the image shows the Windows taskbar with various application icons and the system clock indicating 15:48 on 16-11-2022.
